Educarte communitiy,

Welcome to a new innovative school year.

At Educarte we work to make a difference. Our Costa Rican identity immerse our children into the culture, with their costumes, languages and others.

Through our Values and Orientation program we promote tolerance and respect among all. As we are an intercultural community it is important to undestand and respect each other.

We strongly believe we have the responsibility to guide our children to become a responsible citizenship. Reason why we integrate key themes related to securing a sustainable future, climate, biodiversity, poverty, social justice, which are part of Global Goals. Educarte follows the Global Action Programme from Unesco which strted in 2014 to scale up action in all ESD (Education for Sustainable Development) areas.

Our Electives Programs supports the 7 multiple intelligences and it gives the opportunity to our students to follow their interest, it could be in the sportive area, art, drama, logic mathematics, playing instruments, creating crafts or in technology.

Our goal is to reach a holistic education, through a phenomenon Based learning approach to make our students more knowledagble of the real world and participate in the evolution of the world.
